CONTINUING EDUCATION CREDIT
Physicians: Philadelphia College of Osteopathic Medicine has requested that the AOA Council on Continuing Medical Education provide this program for AOA Category 1-A credit. This program is currently pending. Sign-in and full-day attendance is required for credit. Faculty participating in continuing medical education programs sponsored by PCOM are expected to disclose to the program audience whether they have any real or apparent conflicts of interest or other relationships related to the content of their presentation(s).

PROGRAM OBJECTIVES
The 24th Annual Family Weekend CME program is targeted to the needs of the osteopathic family physician and other primary care health providers.

UPON COMPLETION OF THE PROGRAM, THE PARTICIPANT SHOULD BE ABLE TO:

• Identify the risk factors and limitations of various diagnostic tests for aging.
• Discuss the impact of value-based reimbursement on primary care practice.
• Describe the features of high risk in healthcare.
• Discuss the most common patient safety incidents in primary care.
• Investigate the use of Pennsylvanian for Life: Sustaining Treatment as a tool for advance care planning in the seriously ill.
• Navigate the complex and distinct forms of advance directives currently available.
• Demonstrate knowledge of factors that improve treatment adherence, and how behavioral health professionals can support medical professionals in improving treatment adherence.
• Recognize potential causes of, and identify typical signs of, stress in children that could indicate a potential psychiatric condition.
• Identify and recommend basic interventions for families to try prior to referring to an outside provider such as a psychologist or neuropsychologist.
• Become familiar with the indications and limitations of the newly approved antibiotics for resistant gram-negative bacteria.
• Implement updated vaccine schedule recommendations made by the Advisory Committee on Immunisation Practices in Adults Aged 19 Years or Older for 2017.
• Acknowledge advances in safety and efficacy of certain vaccines leading to changes in recommendations.
• Increase competency in diagnosing and differentiating common infectious and inflammatory skin conditions.
• Understand the importance of outcomes research in infectious disease research.
• Discuss the newest contraceptive options and current guidelines on counseling and practices.
• Identify areas of aging that negatively impact the immune response in older adults.

• Identify the impact of frailty phenotypes on the susceptibility of older adults to infections of the gastrointestinal, genitourinary, skin and respiratory tract.
• Discuss the basic components of an electrodiagnostic study.
• Discuss the pathogenesis of clostridium difficile and the current approach to therapy of clostridium difficile.
• Increase competency in diagnosing and differentiating common infectious and inflammatory skin conditions.
• Understand the reportable disease process for laboratories and public health investigators when patients are tested for HIV infection.

HOTEL ACCOMMODATIONS
A block of rooms has been reserved for registrants and their guests at the Hershey Lodge. Special Rates: $274.00 single/double.
