

FIRE EVACUATION PLAN
CAMBRIA HEALTHCARE CENTER
Philadelphia College of Osteopathic Medicine

IN THE EVENT OF AN EMERGENCY, CALL 911

If you discover fire, smoke, or burning inside your building, immediately:

1. Activate the fire alarm by pulling a manual fire alarm pull station (located near exits)
2. Evacuate
3. Call 911
4. Call PCOM Public Safety at 215-871-6351

INTRODUCTION

This evacuation plan establishes methods and procedures to be used in the event of a fire at Cambria Healthcare Center (HCC). All building occupants (faculty, staff, students, contractors, visitors, etc.) are expected to comply with the procedures contained herein. The Philadelphia Fire Department (PFD) is immediately notified whenever a fire alarm activation occurs. The investigation for cause of a fire alarm activation does not begin until PFD arrives on-scene. All building occupants are expected to immediately evacuate the building if the fire alarm system is active.

All fires, even if extinguished or found extinguished, must be reported to PCOM Public Safety and the PCOM Chief Occupational and Environmental Safety Officer.

OCCUPANT EVACUATION PROCEDURES

General Evacuation Procedures:

If the fire alarm activates, immediately evacuate the area and follow all instructions given by the Public Safety Officers and Emergency Coordinators. Evacuate the building by using the marked exits. Isolate the fire by closing doors as you leave, but do not lock any doors. Do not attempt to extinguish the fire. Do not call Public Safety or anyone else to ask if it is a real alarm. All alarms should be considered real and an immediate evacuation should occur as soon as the alarm activates.

Once outside the building, follow directions from the Emergency Coordinators and Public Safety. If safe to do so, move as far away from the building as possible to allow clear access for those still evacuating and for the fire department and other emergency responders. All occupants should assemble and stay together once outside the building in areas determined by the PCOM Public Safety Officers in order to receive information about the emergency and building status. Depending on the circumstances of the emergency, occupants could be permitted to reenter the building or could be moved to an area of shelter elsewhere on campus.

Do not reenter the building until the all clear is given by an Occupational Safety and Environmental Health representative or PCOM Public Safety.

Philadelphia College of Osteopathic Medicine

Evacuation Instructions for Persons Requiring Assistance:

Because the Cambria HCC is a one story building, no Area or Rescue Assistance is designated.

Patients Undergoing Treatment

Patients undergoing routine medical procedures or examinations are expected to exit the building when the fire alarm activates.

If interruption of patient treatment could potentially compromise a patient's health or seriously compromise the expected results of treatment, the treating doctor or supervising faculty member may decide to protect the patient in place, along with any necessary treatment personnel. The medical procedure can continue to be performed as long as there is no fire or smoke in the vicinity. If there are signs of fire or smoke, the patient and treatment personnel must evacuate or relocate to the Area of Rescue Assistance and await further directions from emergency responders.

The intent of this evacuation procedure is to apply to patients are being treated for a medical emergency. The ultimate evacuate/protect in place decision will be made by the individual responsible for the patient.

The Emergency Coordinator must be notified when patients will be protected in place, so that they can record this information on the Emergency Coordinator report.

Important Reminders:

There are two main exits serving the Cambria HCC: one on the north side of the building (main entrance) and one on the south side of the building. Both exits discharge directly to the exterior of the building, with the north exit discharging to W. Cambria St and the south exit discharging to parking lot behind the building. Occupants should know the location of each exit and should use the closest one in the event of an evacuation. All exits are clearly marked with illuminated exit signs and are identified on the evacuation floor plans located within the building.

When the fire alarm is active, exit directly to the outside. Evacuate in an orderly manner - don't panic. Walk, don't run. Obey the directions of all emergency response personnel. Stay in a single file line when exiting. Fire department personnel may be coming into the building in the same entrance/exit to investigate or fight the fire.

Before opening the door to any room or office, feel the door first to see if it is hot. If the door is not hot, open it slowly. If smoke is near the ceiling, stay low and crawl under the smoke to reach the emergency exit. Keep your face near the floor where air will be breathable.

If all exits from a floor are blocked, return to your work area and do the following:

FIRE EVACUATION PLAN
CAMBRIA HEALTHCARE CENTER
Philadelphia College of Osteopathic Medicine

1. Close the door
2. Place a towel or article of clothing along the bottom edge of the door
3. Open the windows for fresh air if possible and hang an article of clothing or other similar item out the window to let the fire department know you are still in there. If the window cannot be opened, DO NOT break the glass.
4. Call PCOM Public Safety to report your location and await further instructions

BUILDING EVACUATION RESPONSIBILITIES

Emergency Coordinators:

A minimum of three Emergency Coordinators are required on each floor. Emergency Coordinators must attend a training class taught by the PCOM Fire Marshal. Emergency Coordinators have the following responsibilities:

1. Conduct an orderly evacuation of their immediate area by directing occupants to the nearest unobstructed fire exit.
2. Assist and direct occupants that are unable to self-evacuate to the Area of Rescue Assistance.
3. Confirm the number of persons in the Area of Rescue Assistance.
4. Ensure the entire floor, or their portion of the floor, is searched.
5. Exit using the nearest stair.
6. Report to the main entrance.
7. Record number of persons in the Area of Rescue Assistance and any fire/smoke conditions observed. Additionally, record the number and location of any individuals that refused to evacuate, if any.

The first Emergency Coordinator to reach the main entrance of the building will assume the responsibilities of the Lead Emergency Coordinator.

Lead Emergency Coordinator:

The Lead Emergency Warden will be stationed at or near the main entrance and will record the reports of Emergency Coordinators as they exit the building. An Emergency Coordinator Report clipboard is located at the security desk.

The Lead Emergency Coordinator will provide information to the COESO, Occupational and Environmental (OES), PFD, or Public Safety depending on who is on-scene. Report the number and location of occupants in the Area of Rescue Assistance and any fire or smoke conditions observed by Emergency Coordinators.

Public Safety Officers:

Public Safety Officers have the following responsibilities when the fire alarm activates:

1. Place Emergency Warden clipboard and Building Coordinator vest on top of security desk with pen.
2. Prevent anyone from entering building not authorized to enter during fire alarm until the All-Clear is given.
3. Until the COESO or PCOM Public Safety arrive on-scene, direct occupants away from the front of building, either across the street, if safe to do so, or down the sidewalk.

Additional Assistance:

Additional assistance is typically provided by the PFD, Public Safety, Occupational and Environmental Safety, and Plant Operations.

PFD's primary responsibilities are inside the building - assisting with evacuation and controlling the incident.

Public Safety's primary responsibilities are outside the building – assisting with traffic control and occupant/pedestrian safety.

The Occupational and Environmental Safety representatives act as a liaison between PFD and the Emergency Coordinators. The Occupational and Environmental Safety and Public Safety representatives determines when the building is safe for reentry.

Plant Operations is responsible for providing assistance with keys, communications, fire protection and alarm systems, and whatever else may be needed.

All of the above groups have several other responsibilities as well. Each group has their own detailed fire alarm response procedures. The information is included only to give a general overview of their involvement.

FIRE DRILLS

As required by the Fire Prevention Code, regular fire drills to practice the evacuation procedures outlined in this plan will be conducted in Cambria HCC by the PCOM COESO. Fire drills will typically be unannounced to building occupants. A complete evacuation of the building is expected during all fire drills.

BUILDING FIRE ALARM SYSTEM

The fire alarm system installed in Cambria HCC is directly connected to the PCOM Public Safety Desk in Rowland Hall. PCOM Public Safety will know immediately if the fire alarm activates in the

FIRE EVACUATION PLAN
CAMBRIA HEALTHCARE CENTER
Philadelphia College of Osteopathic Medicine

building and PFD is immediately dispatched. However, Public Safety should still be called if you activate a manual pull station to provide additional information about the incident.
