EDUCATING THE FRONT LINES OF HEALTH

AT PHILADELPHIA COLLEGE OF OSTEOPATHIC MEDICINE (PCOM), WE ARE FUELED BY HUMANITY.

We find humanity at the intersection of purpose, empathy, curiosity, collaboration and community. It's found when we work with intention and prioritize consideration and connection. This humanity guides us in all that we do. It's why we treat the whole person. Why we ask more questions. Why we work in teams across disciplines to find better answers. It's why we're shaping the future of healthcare. And it's what makes us PCOM.

Collaboration fuels camaraderie, better patient understanding fuels whole-person health and a PCOM education fuels a brighter generation of future health care leaders. Building on the osteopathic tradition, we have continued to develop additional innovative programs ranging from Clinical Psychology to Pharmacy. Our whole-person focus inspires a whole-picture perspective across disciplines—empowering all of our students to pursue meaningful careers as part of the front lines of healthcare.

- + Students at PCOM are immersed in an integrated, team-oriented approach to learning.
- + PCOM has been a leader in osteopathic medicine for more than a century. We also have two additional locations in Suwanee, Georgia and Moultrie, Georgia.
- + Many PCOM students are highly engaged in their communities through a wide variety of philanthropic efforts and advocacy.
- + PCOM fosters and celebrates a diverse community—one which cultivates inquiry, inquisitiveness and respect—and an appreciation for the camaraderie which unites us.

THREE LOCATIONS, ONE MISSION

PCOM GEORGIA

Responding to a need for more medical professionals in the South, PCOM Georgia opened in 2005. Our modern facilities offer many resources, including large and small classrooms, conference areas and study spaces, multi-use laboratories, an anatomy lab, pharmacy practice labs, simulation lab and more. All of these resources help students become pharmacists, physicians, physician assistants, physical therapists, biomedical scientists and medical lab scientists who focus on the whole person.

PCOM

Campus is located in Philadelphia, a city that boasts some of the top hospitals and medical schools in the nation. It's the ideal environment to build a network and launch a career in the world of healthcare. Our campus features video-equipped amphitheaters, a library, research and anatomy labs, the Saltzburg Clinical Learning & Assessment Center with simulation rooms, our renowned Osteopathic Manipulative Medicine Teaching Center, a gym, cafeteria, meditation spaces and more.

PCOM SOUTH GEORGIA

Extending our commitment to the State of Georgia and the Southwest Georgia region, in 2019, PCOM added an additional location—PCOM South Georgia—in Moultrie. The 75,000-square-foot, state-of-the-art facility includes classrooms, an anatomy lab, an Osteopathic Manipulative Medicine lab, a simulation center, small group study rooms, information commons and a café. Since its founding, PCOM South Georgia has been providing the same educational excellence that has made PCOM a national leader in osteopathic medical education.

STRONGER
CONNECTIONS
LEAD TO

LARGER IMPACTS

Our students experience all the advantages that come with attending a medical school like PCOM; one that infuses a whole-person philosophy across all academic programs. A school with a community as tight knit as PCOM provides the opportunity to learn in an environment where peers share similar academic interests and more focused academic support from faculty is always available.

At PCOM, meaningful interaction and interdisciplinary collaboration among students nourishes a deeply connected network of community and camaraderie. Our student body is made up of an array of individuals who come from different personal and professional backgrounds. Together, they use their shared interdisciplinary knowledge gained at PCOM to positively impact the world beyond the classroom—developing innovative solutions to complex problems.

As experts in their respective fields, our educators care deeply about equipping their students for success—both academically and professionally. They work closely with students in a hands-on experiential learning environment and support them through every step of their educational journey.

MANY PATHS TO SHAPE YOUR FUTURE

Every academic program that we offer at PCOM was intentionally and strategically designed to enhance the impact our students make in their careers and the communities they serve. We offer a wide range of academic programs, all of which

teach students to care for the whole person and look beyond the obvious to find the best solution. They develop a powerful set of skills—knowing how to ask the right questions, listen for answers and make connections where others might not see them.

"PCOM is an educational and research institution that stands apart. We view our students as the next generation of healthcare leaders and we train them accordingly. Above all, we instill a whole-person approach to health, empowering our students to advance the health and well-being of the communities they will serve."

— Jay S. Feldstein, DO '81,
President and Chief
Executive Officer

PROGRAMS OF STUDY

PCOM (Philadelphia, PA)

- Applied Behavior Analysis (MS, CAGS)
- Biomedical Sciences (MS, CGS)
- Clinical Psychology (PsyD)
- Cognitive Behavior Therapy (CAGS)
- Educational Psychology (PhD)
- Forensic Medicine (MS)
- Mental Health Counseling (MS)
- Non Profit Leadership and Population Health Management (MS, CGS, CAGS)
- Organizational Development and Leadership (MS, CGS, CAGS)
- Osteopathic Medicine (DO)
- Physician Assistant Studies (MS)
- Professional Counseling (CAGS)
- Public Health Management and Administration (MS, CGS, CAGS)
- School Psychology (PsyD, EdS)

PCOM Georgia (Suwanee, GA)

- Biomedical Sciences (MS, CGS)
- Medical Laboratory Science (MS)
- Medical Simulation (Certificate)
- Osteopathic Medicine (DO)
- Pharmacy (PharmD)
- Physical Therapy (DPT)
- Physician Assistant Studies (MS)

PCOM South Georgia (Moultrie, GA)

- Biomedical Sciences (MS, CGS)
- Biomedical Sciences (MS) - Preclinical Sciences
- Biomedical Sciences (Certificate)
- Osteopathic Medicine (DO)

PCOM shapes an environment that respects, embraces and fosters an inclusive and vibrant community to further excellence in health equity through education, advocacy and community outreach.

Applying to PCOM

Early applications are strongly encouraged, as the application process for any PCOM academic program is on a rolling admissions basis. Details are listed on the application requirements page for your program of interest. Visit [pcom.edu/admissions](https://www.pcom.edu/admissions)

To schedule a virtual or in-person visit, please go to www.pcom.edu
